RELEVANT PROJECTS:

1. Project Name: Equity Capital Markets (March 2022- Today)

Domain: Investment Banking

Client: Evercore's Investment, USA

Testing Methodology: Functional Testing, Database Testing and Automation Testing

Description:

Evercore's Investment Banking business advises its clients on mergers and acquisitions, divestitures, restructurings, financings, public offerings, private placements and other strategic transactions and also provides institutional investors with macro and fundamental equity research, sales and trading execution. Evercore's Investment Management business comprises wealth management, institutional asset management and private equity investing. Evercore provides independent financial restructuring advice to companies, creditors, shareholders, and other stakeholders, both in and out of court. The company specializes in providing advice to clients on complex balance sheet issues and transformational situations.

2. Project Name: Cortex EDI Practice Management Software (Feb 2021-Feb 2022)

Domain: Health Care

Client: Cortex EDI, USA

Testing Methodology: Functional Testing, Database Testing and Automation Testing

Description:

Cortex EDI is a cloud-based practice management solution that is designed for the healthcare industry. It includes features such as electronic claims submission, accounts receivable, patient eligibility checks and claim status inquiry. The Electronic Biller helps users to file claims for the purpose of medical billing. The claim tracking feature provides information on claims that are approved and denied and helps users to get a detailed view of claims history, pending claims information.
