Project Summary:

Role : Senior Software Test Engineer

Project / Client : CoinDCX

Period : 08-Oct-2021 to Till Now

Technologies / Tools Used / Environment : Jira, Amplitude, Moengage, Postman, Android studio, Burp Suite, Data dog

Description: CoinDCX is leading crypto exchange in India and most valuable crypto investment app, is dedicated to make crypto accessible in a simple way. CoinDCX has solved numerous problems faced by the Indian crypto community with solutions around crypto investing, crypto trading & crypto literacy.

Key Responsibilities:

- Understanding the application thoroughly with the help of customer requirement specification documents.
- Involved in testing Mobile apps and Web platforms
- Created new test cases for new features and uploaded to Zephyr scale for execution
- Involved in testing events for newly implemented features using Amplitude
- Execution of test cases for Sanity testing.
- Daily standup meeting, Status update to the customer.

Role : Senior Software Test Engineer

Project / Client : Lulu Shopping

Period : 05-Apr-2021 to 07-Oct-2021

Technologies / Tools Used / Environment : Manual Testing, JIRA, Firebase, Agile, Android studio, Swagger.

Description: Lulu Shopping is one of the largest retail chains in Asia and is the biggest in the Middle East with 212 outlets in the Gulf Cooperation Council (GCC) countries. Lulu shopping app is available in both Android and iOS platforms with 8 countries product order facilities. I was part of mobile app testing for GCC countries.

Key Responsibilities:

- Involved in functional and regression testing.
- Involved in Firebase event testing for both platforms.
- Created Test cases for new features
- Execution of test cases for Smoke testing and Sanity Testing
- Daily standup meeting, Status update to the customer.

Role : Test Engineer**Project / Client : My Retirement Picture****Period : 08-Oct-2019 to 01-April-2021**

Summary: This App helps those approaching retirement to understand their options for converting their savings into a sustainable retirement income. This is to help them to become advice-ready and more likely to make choices beneficial to them in the long term. The “My Retirement Picture” web app will be a gamified, visual calculator that will enable the user to build a picture of the lifestyle that they can expect in retirement.

Roles & Responsibilities :

- Understanding the app thoroughly with the help of customer requirement specification document.
- Involved in functional and regression testing.
- Created Test cases for new features
- Execution of test cases for Smoke testing and Sanity Testing
- Daily standup meeting, Status update to the customer.
- Monitor issues reported by the employee on a daily basis.

Project Name : Simulcation**Environment : Web and Mobile****Role : Test Engineer****Period : 23-Dec-2018 to 07-Oct-2019**

Summary : Simulcation is developed to offer a solution to the traditional problems associated with business training. In Simulcation Datacenter - the first of our simulations - users discover the real-life consequences of their decisions. By finding the right mix of products, services and skills, they will make better choices and communicate the wider benefits to their organization in real terms.

Roles & Responsibilities :

- Understanding the application thoroughly with the help of customer requirement specification document.
- Involved in functional and regression testing.
- Created Test cases for new features
- Execution of test cases for Smoke testing and Sanity Testing
- Involved in creating Xpath for web elements.
- Executing the automation test scripts and reporting bugs in Trello.
- Executed script and generated the reports in Eclipse.

- Uploading failed test scripts to box account
- Daily standup meeting, Status update to the customer.

Project Name : AMC'S No Man's Lands

Tools : Jira, Logentries , Charles proxy

Role : Test Associate

Period : 15-Dec-2017 to 22-Dec-2018

Summary: No Man's Land is a turned based game and developed & produced by AMC Production house where all the user details are present in it and also includes their virtual currency all the tools required to test the mobile game added in the dashboard. Each aspect of survival on AMC's The Walking Dead has been parallel to the series' official mobile game Dashboard, subtitled as No Man's Land.

Roles & Responsibilities :

- Performed Sanity testing.
- Designing and Execution of test cases.
- Perform functional, Integration, compatibility and Smoke testing.
- Performed Smoke and Regression test against new builds.
- Report and track issues on a daily basis.
- Daily standup meeting, Status update to the customer.
- Interacted with client on Weekly sync calls

Educational Qualification:

- **B.E** in Mechanical Engineering-64.09% from NHCE, Bangalore
