CRIO MASTERS IN QA AUTOMATION

QA-QKart 🔗
September 2023
- The application under test is OKart, an e-commerce platform
- Debugged failing test cases and issues with log statements
- Automated test cases for end-to-end testing of user flows with selenium.
- Improved the tests with XPath
- Utilized implicit and explicit waits correctly to avoid synchronization issues.
- Migrated all tests to the TestNG automation framework
- Performed Data driven test automation with Apache POI
- **Skills**: Java, Selenium, Locators, HTML, Developer Tools, XPath, TestNG, Apache POI, Selenium Grid.

QTrip 🔗
March 2024
- Designed and automated 4+ test cases following Page Object Model design pattern using Page Factory, Selenium and TestNG
- Utilized Apache POI in each test to accept dynamic test data.
- Created a TestNG project for easily running automated test cases.
- Implemented Singleton pattern for initializing Wedbriver to make effective use of resources.
- Generated customized test reports for the TestNG project using Extent Reports.
- **Skills**:Java, Selenium, Locators, HTML, Developer Tools, TestNG, Page Object Model, XPath,Extent Reports

Make My Trip Automation 🔗
December 2023
Project Description: Automated Make My Trip website to get flight, bus, and train details from two destinations and validate the search functionality of the website.
Automated the following test cases:
- Verify Make My Trip Homepage URL
- Get Flight Details from Bangalore to New Delhi
- Get Train Details from Bangalore to New Delhi
- Verify that there are no buses from Bangalore to New Delhi
Skill Used: Selenium, Dynamic Xpaths, Window handling
